In Passivhaus design teaching spaces to be orientated North or South for optimum control of solar gain

Locate teaching spaces based on heat losses / gains eg Science / IT and lighting needs eg Art

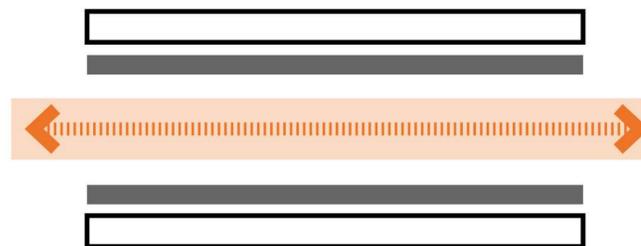

Ribbon of circulation and activity winds up and around the heart of the building

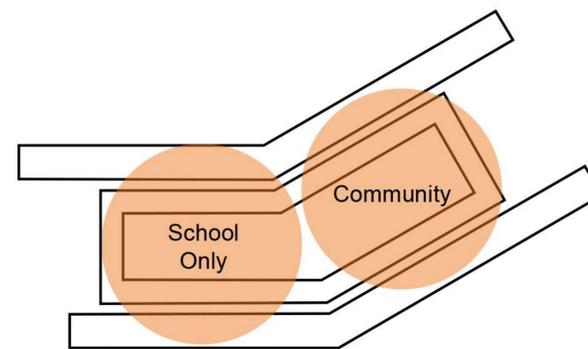

Cranked form to respond to the site, and address Gilmerton Rd. Dance and fitness positioned to front to create active frontage.

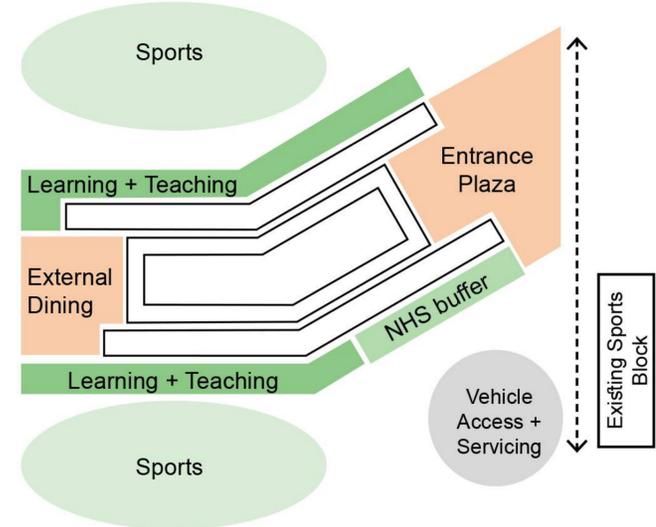

Bank of collaboration, and support spaces associated with teaching

Bright airy street of dining, social and community spaces separated by the two wings

Natural transition between 'community' and 'school' ends of the central space

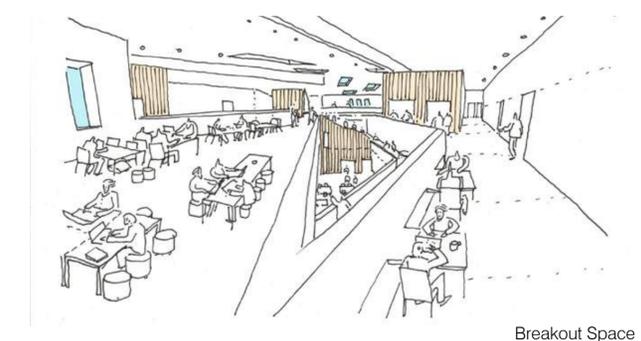

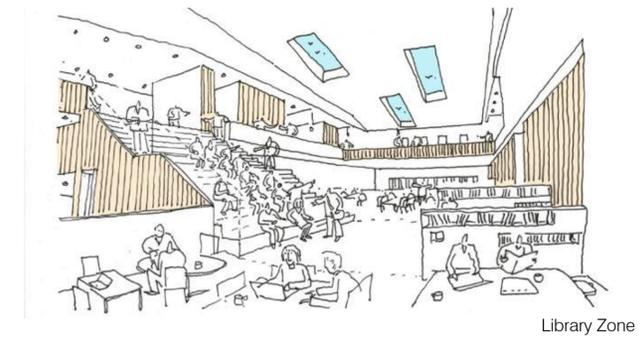

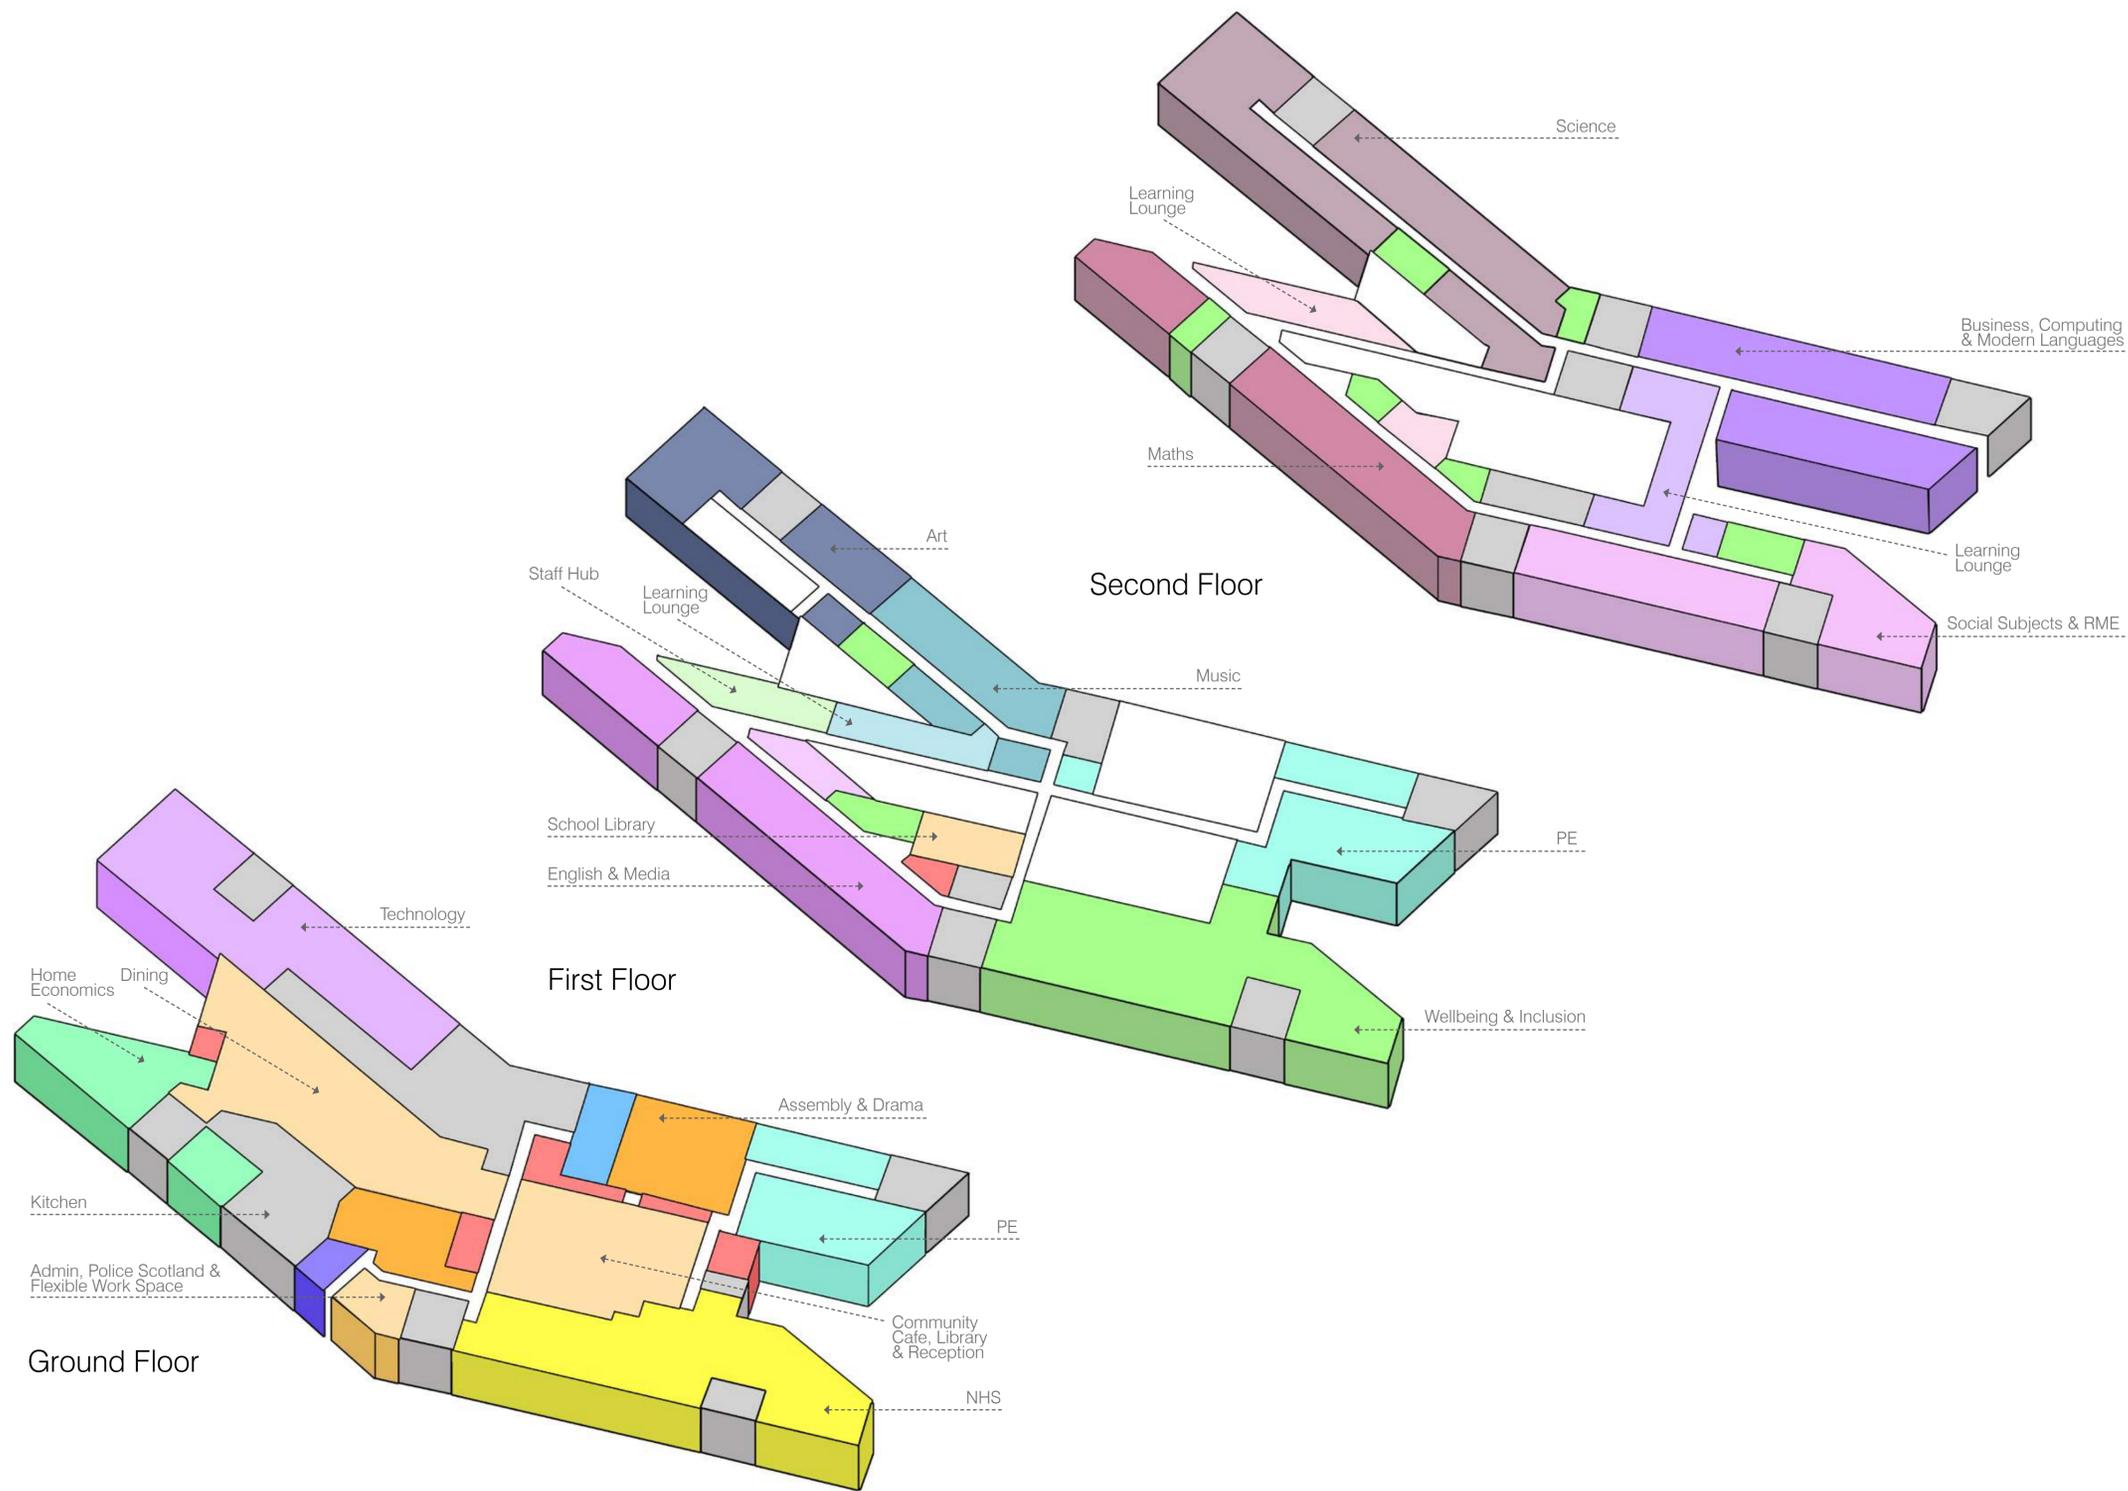

Develop the learning landscape
