

OUTDOOR AMENITY SPACE

The route offers an opportunity to connect a series of different types of outdoor space. Extending from Dalry Park to Sauchiebank the route passes play space and through woodland along an undulating landscape often adjacent to Residential and busy roadways.

The main strategy will be to create three main different types of outdoor amenity space; a re-vitalised Dalry Playpark which has a series of focussed areas for different age groups, a natural woodland with minimum interventions and a re-imagined colourful stepped 'hanging gardens' at Sauchiebank. Each part of the chain will offer a different type of amenity from active day/evening use through to quiet and pleasant destinations- all interconnected by a constant well-lit and safe pathway.
