

WAVEGARDEN BRIDGE AND CYCLE LINK PRE-APPLICATION ENGAGEMENT

PROPOSED SHARED CYCLEPATH

SHARED CYCLEPATH

- Designed in accordance with Sustrans Design Guidance.
- Suitable for cyclist and pedestrian use.
- Proposed shared cyclepath to include bound surfacing.
- Total length of cyclepath is approximately 335m.
- Protective guardrail or fence will be provided where necessary.

GROUND CONDITIONS

- Ground investigations targeted the initial alignment, which crossed a steep side slope.
- The investigation revealed the slope to be formed of coarse fill materials, and to be of poor engineering quality.
- The ground conditions encountered were not favourable for construction of necessary foundations due to varied and large material obstructions.
- Ground conditions at the current alignment are anticipated to be more favourable.
- Further ground investigations are planned to target the current alignment.

BRIDGE AND CYCLE LINK PLAN AND VISUALISATIONS
