The Future of Waverley Station

Welcome

Waverley Station is a key transport interchange serving Edinburgh and Scotland. Passenger numbers are estimated to more than double over the next 30 years. The proposed Masterplan is for an enhancement of Waverley Station. The objective of the Masterplan is to ensure that the station can accommodate the forecast growth and to do it in a way that is fitting for the prominent location it holds within the city.

The Masterplan process sets out a route map to develop the station and the adjacent areas to ensure it can accommodate this growth, and do so in a way that will fit in with the surrounding location it holds within the city.

This is a pre-design consultation. The Masterplan proposals set out a range of ideas to improve your experience of the station and adjacent areas. We want to know what you think of the current station and our ideas to improve it.

Next Steps
Welcome

Waverley Station is a key transport interchange serving Edinburgh and Scotland. Passenger volumes are estimated to more than double over the next 30 years. Network Rail, the City of Edinburgh Council and Transport Scotland will work together to plan for this growth with a Masterplan that considers what changes are needed over the next 30 years.

The Masterplan process sets out a route map to develop the station and of our ideas for improvement. We would like your input on its future development. Wherever possible, it should improve and enhance this.

The station has changed over time and we would like your input on its future development. The station site is incredibly historic sensitive repair of the grade 1 listed grade 1 listed building will be needed to maintain its heritage value.

The Masterplan proposals must recognise the architecture and heritage value of both the station and of our ideas for improvement. The station site is difficult with no distinctive relationship between street and no clear route to the station is difficult with no distinctive relationship between street and no clear route to

The station today is very busy and footfall is predicted to increase significantly. Many stations in the UK and abroad have undergone ambitious objectives for the Masterplan strategy. This has a number of key challenges we have identified with the current station layout:

• Historically sensitive repair of the grade 1 listed building will be needed to maintain its heritage value.
• Formation of a new and substantially enlarged
• Creating a premier transport hub while retaining all
• Filled with natural light.

The Vision

The Vision is ambitious for the Masterplan strategy. The station site is incredibly historic sensitive repair of the grade 1 listed building will be needed to maintain its heritage value.

Next Steps
The Future of Waverley Station

Understanding the site

The Station Challenges

- Requires a better link strategy as footfall and the recent electrification increased
- Limited vehicular access
- Poor separation of taxi and other traffic
- Difficulty in pedestrian wayfinding
- Entrance challenges

The City Challenges

- Heritage and Existing
- Impacts of significant development
- Unpredictable growth
- Limited vehicular access
- Multiple levels

The Vision

Project Objectives

- The vision is to create a world class environment
- Accommodates growth
- Enhances the existing unique rich heritage
- Improves passenger circulation
- Filled with natural light

Development of Masterplan Approach

- Significant development
- Preferred approach
- Opportunities

Improvement Strategies

Opportunities

- Enhancing the existing unique rich heritage
- Providing an appropriate scale of development
- Improving connectivity by creating connected concourse area separate
- Enhancing the existing unique rich heritage
